RESTRICTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 8, drawn to a method of etching, classified in class 216, subclass 22.
- II. Claims 9 to 14, drawn to a magnetic recording disk, classified in class 428, subclass 65.3.

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as forming grooves by mechanical engraving and abrading.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their differing classifications adding an undue burden on examination and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Marc Rossi on 07/27/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

CONCLUSION

The claims are 1 to 14.

- Restriction has been required.
